

# Specialty Home Health Care In-Home Therapy Programs

Specialty Home Health Care employs our own full team of therapists to provide one-on-one rehabilitation in your patient's home environment, utilizing all the latest equipment. We strive to rehabilitate patients to a state of safe independence at home. Specialty's staff of physical, occupational, and speech therapists provide a team approach by collaborating to set goals based on the patient's maximum potential.

- Post Hospitalization Rehab
- Post Orthopedic Surgery Rehab
- Cardiac Rehab Program
- Pulmonary Rehab Program
- Seamless Transition from Inpatient to Home
- Self-Management Programs to Promote Independence at Home
- Physical Therapy
  - ETPS
  - Ultrasound
  - E-Stim

  - Vital Stim
  - Cognitive Training to Improve Executive Function

Research shows that working with patients in their home environment is one of the best ways to identify fall risk. Our therapists have extensive knowledge and training to ensure the home environment is safe and accommodates each patient's specific needs.

*"Because of Specialty Home Health Care, I have become more independent and am able to do my daily chores again. I really look forward to their visits." – Wanda Stevens*

*"Without the help of the speech therapist, as well as the use of Vital Stim, I don't think I would have progressed as well as I did. It helped me to be able to eat solid foods and drink unthickened liquids again. A big thank you to my therapist Amy. The care was impeccable." – Kenneth Schmitt*
